

Wall hinged rope frame

15720AXXX

Details

Wall hinged rope frames are fantastically useful pieces of PE equipment to incorporate in a curriculum. Continental's epoxy powder coated heavy gauge steel frame produces a very strong and stable unit.

A single overhead cable and locking system combined with substantial floor shoot-bolts lock the frame into its working position.

Radiators and windows can be spanned without difficulty.

Available in two sizes:

- Keystage 1 & 2 - 3m (10') high x 3m (10') wide
- Keystage 3 & 4 - 3.66m (12') wide x 3.66m (12') high

We recommend a maximum of four suspension points for accessories on the 3m unit and five on the 3.66m unit. These can be chosen from any combination of:

- Climbing ropes (9cm and 11.5cm circumference)
- Knotted ropes (9cm and 11.5cm circumference)
- Trapeze
- Handrings
- Linked rings
- Rope ladder
- Interchangeable handrings / trapeze

Please note, the ropes on this frame are designed for climbing and not swinging.

This item requires a wall fixed tension clamp which is installed as standard on a timber patress. A padded tension clamp cover is available at additional cost.

The price shown for this items is **WITHOUT ACCESSORIES** (i.e. it is the frame ONLY). You need to add accessories - please see the "accessories" tab to add ropes etc.

SKU	Options	Available Colours
15720A02AA-3.0m	3.0m x 3.0m (10' x 10')	N/A
15720A02AA-3.6m	3.6m x 3.6m (12' x 12')	N/A
