

Storage trolley for rebound screens

Details

This epoxy powder coated trolley has heavy duty non marking castors (two swivel and two fixed) for easy manouverability.

Although Continental's rebound screens have integral wheels, this storage trolley ensures the panels are protected and stored properly in the storeroom and provides a useful storage compartment for the supporting posts for your screens.

The flat bed of the trolley measures 2.44m x 1.22m with an overall size including the storage area for posts of 2.7m x 1.22m
