

Socketed badminton post storage base

Details

This innovative storage base enables up to five pairs of socketed badminton posts to be stored easily in a compact area of your store. It helps protect the posts from damage at the same time as keeping your store tidy.

The base is heavy steel for stability with a cushioned latex underside both to protect your storeroom floor and with anti-slip characteristics.

The sockets on the base enable posts to be stored vertically ensuring storage space is minimised and to remove the health and safety risk of having posts scattered on the storeroom floor.

Supplied in red as standard, but also available in a range of other colours such as white, yellow, green, black or blue on special order.

Alternatively why not try the wheeled version of this storage unit - our socketed badminton post storage trolley
