

Gymnastic anchor installation

Details

Our gymnastics anchors provide the safe and secure fixing necessary to safely anchor gymnastics apparatus to your floor.

Anchors are available for self-installation but if you would prefer the peace of mind of leaving installation to our in-house installation engineers, we would be pleased to install the anchors for you. This item is the **INSTALLATION ONLY** of anchors that you must purchase separately on a **SUPPLY ONLY BASIS**, to give you anchors on a **SUPPLY AND INSTALLATION BASIS**

To have gymnastics anchors installed by Continental:

1. Add the number of anchors you require on a "SUPPLY ONLY" basis to your basket
2. Add the same number of anchor installations to your basket
3. An "Area Charge" applies which is based on your distance from our factory and is determined by your postcode. The Area Charge will be added to your basket at checkout. You do not have to commit to your purchase until after you have seen the amount Area Charge.

If you have a suspended floor that requires extended anchors you will require bushing covers to be installed above each anchor. If you have a Junckers floor please order the bushings from Continental and we can install them at the same time as the anchors. If you have a different type of suspended floor you will need your flooring contractor to install the appropriate bushings prior to us installing the anchors.
