

SPIETH - Competition uneven bars "Bern"

Details

Uneven bars from Spieth designed for top level competition use. The bars are FIG certified for use at all levels of competition. Supplied with a pair of round, hollow bars manufactured from a fibreglass core with a wood laminate cover with Carboflex®. The bars are height adjustable in units of 5 cm and feature integrated castors

The bars incorporate a patented double tensioning system which means a tensioning device becomes obsolete resulting in a lowered risk of over-tensioning.

The bars are adjustable as follows:

- High bar: 226 to 276 cm (steps of 5 cm)
- Low bar: 146 to 196 cm (steps of 5 cm)
- Width: 110 to 185 cm (continuously)

FIG Approved
