

# CLUB 225 portable backstop

## Details

The all-new CLUB range now boasts many of the features found in our world-class Super SAM units. Built to take the punishment of slam-dunks, the CLUB is an economical main court system for clubs, high schools, community halls, national/regional competition of all levels. For top competition arenas and gyms, the CLUB 225 is the perfect side court unit.

The SAM CLUB 225 is a complete portable backstop unit with 225 cm projection and is FIBA approved to Level 3. The goal features:

- Spring Assisted Mechanism for one-person set-up
- Automatic Pedestal Feet ("APF") one-step set-up system
- Tempered glass backboard
- Unidirectional breakaway ring
- Anti-whip net;
- Safety padding to front, sides, and backboard in standard Schelde blue colour;
- Floor connector set and floor hook are included (installation extra)

There are various options / versions of this goal available:

- Manual APF instead of automatic APF (needed for certain hall lengths - see Specifier Information Tab above)
- Padding is included in Schelde blue, but is available as an option in black, red, orange, yellow or green
- Shotclock brackets (2 or 4 sided shot clocks)
- LED strip on the backboard (compatible scoreboard system is required)

### Hall length

Portable basketball goals with large projections are by necessity very large. They require a large space behind the baseline of the court to accommodate the body of the goal so it is essential that you ensure your hall is large enough to accommodate the units before you order them. There will be a significant re-stocking charge (or potentially no possibility to return the goals) if you order portable goals and discover on delivery they do not fit.

Please refer to the table below to determine if this goal fits in your facility and also any modifications that are

necessary to accommodate it. The lengths given assume your basketball court is a standard 28m (between the inside of the baselines) and it is centrally located along the length of the hall. If you have a shorter court or the court is offset then please contact us for bespoke calculations:

<b>Hall length</b>	<b>Requirements</b>
< 33.9m	DOES NOT FIT
33.9m - 34.3m	Goal fits, but side anchoring is required
> 34.4m	Goal fits with standard anchoring
33.9m - 36.3m	Manual rather than automatic pedestal feet are necessary
> 36.3m	Goal fits with APF and standard anchoring
