Cableless low training bar

01273C01AA

Details

This cableless training bar has uprights bolted diretly into a solid floor. This bar is perfect for mounting over a U-shaped training pit but can also be used at floor level for smaller gymnasts

The galvanised steel uprights feature an easy-to-adjust height adjustment facility to provide heights from 300mm to 1300mm in 100mm increments.

The training bar is available with your choice of either:

- an ultrasonically tested polished steel high bar
- a timber veneered fibreglass uneven bar

The lack of cables provides more freedom for the coach to be able to provide spotting and coaching without the risk of tripping over cables.

PLEASE NOTE: This item must be bolted directly to a suitably solid floor. You must be able to drill at least 100mm into your floor slab to accomodate this apparatus. Four fixings per upright to suit a soild floor are included with this item ready for self-installation.

SKU	Options	Available Colours
