

# JOOLA - Outdoor J200A outdoor table tennis table

## Details

The JOOLA Outdoor J200A is equipped with many practical features that make it the ideal table tennis table for outdoor use:

The transport system with 8 x 7 cm diameter large rollers allows the entire construction to be moved easily and flexibly. The castors can be locked and thus help to ensure safety and stability.

The 6mm thick table surface made of aluminum composite material is lacquered in a complex process and sets standards in terms of outdoor playability with its even ball bounce.

Table tennis fun is guaranteed - either with friends or in solo play mode by folding up one half of the table into the playing position. The height-adjustable table legs ensure a level playing surface.

Excellent playing characteristics paired with a fashionably stylish design bring table tennis fun with the JOOLA Outdoor J200A to your home, on your terrace and in your garden
