

# JOOLA - Outdoor J500A outdoor table tennis table

## Details

The JOOLA Outdoor J500A is an outdoor table tennis table for the highest demands. The weatherproof, 6mm thick table surface made of aluminum composite material is lacquered in a complex process and sets standards in terms of outdoor playability with its even ball bounce.

The transport system with 8 large, lockable castors on 15cm diameter castors per table-half ensures excellent mobility, even in the rather uneven outdoor area, and at the same time guarantees stability and safety.

The table legs are height-adjustable, which enables an uncomplicated level playing surface.

The two separate halves of the table are foldable so that the table tennis table can easily be converted into a solo game mode.

The JOOLA Outdoor J500A is delivered 95% pre-assembled and can therefore be set up in just 15 minutes. A weatherproof table tennis net with a practical clamping mechanism is included in the scope of delivery.
