Carpet roll dolly

Details

These dollies are perfect to enable the easy transport of Tribond rolls, rhythmic carpet rolls, agility mat rolls - or any similar obejct to and from storage.

The dolly has a sturdy steel frame and has four ultra-heavy duty "easy-swivel" castors to enable a heavy mat roll to be moved in any direction by one person.

The castors feature non-marking polyurethane wheels.

The dollies have been developed by Continental's technicians who set up and dismantle gymnastics apparatus regularly and are considered by them to be perfect for that purpose.

The dollies measure:

- 915mm long
- 540mm wide (410mm internal)
- 210mm high

Please note: mats should not be stored on these dollies as they can leave indentation on the matting after prolonged storage - they are for transportation only
