

Podium

Details

Continental manufacture the raised podium between activities using a combination of steel uprights and bracing, along with timber joists and a timber deck.

Fully compliant with UK Building Regulations, our podium is an essential element to complete the look and feel of your park.

Designed in compliance with PAS 5000 and DDA regulations on minimum widths, we complete the top surface of the podium with a layer of "Tribond" which is a 35mm thick cushioned layer of foam and carpet laminate. Carpet is available in a wide range of standard colours or a bespoke colour subject to minimum order quantities. Other possible surfaces we can provide include cushioned artificial grass or rubber gym flooring with additional matting to ensure PAS 5000 compliance.

We can include lockable doors into the podium to provide inspection and maintenance access and to give access to use the space under the podium for storage.
