

DIY upholstery kit for competition ladies beam

01286D01AA

Details

DIY beam upholstery kit comprised of:

- 10mm foam interlayer (older Continental beams used a carpet interlayer, but newer beams use this resilient foam layer for better performance and a softer landing - older beams can be upgraded to the new system using this kit)
- 5m long suedette cover
- contact adhesive
- instructions for recovering Continental beams.

The kit is available in two versions depending on whether your beam is an older style without rubber end caps (ends of the beam are suedette) or a newer style with rubber end caps (ends of the beam are black rubber).

This kit suits all 5m long Continental suedette ladies beams - competition height, low height and floor model.

PLEASE NOTE: original suedette should be removed before recovering

SKU	Options	Available Colours
01286D01AAREC	Suits rubber end caps	N/A
01286D01AASE	Suits suedette beam ends	N/A
