

Training beam

1414TRAIN

Details

Designed for training, this Soft Top beam from Spieth incorporates an aluminium body with an extremely elastic filling to provide great shock absorption.

The shock absorption is ideal to reduce the the impacts on the gymansts joints from high training frequency

Complete with soft rubber end caps

The beam bodies are available in two widths:

- Standard - 10cm wide
- "Maxi" - 20cm wide

and are available in two lengths (Maxi width is only available in standard 5m length):

- Junior - 3m
- Standard - 5m

Both lengths are supplied on fixed timber feet to give an overall height of 30cm
