

Ballet barre

01200A01XX

Details

Ballet barre with supports manufactured by Continental Sports is perfect for dance studios, fitness suites, drama rooms and similar facilities.

The barre is manufactured from 48mm diameter Colombian Pine, sanded, lacquered and mounted on epoxy powder coated support brackets. Brackets are grey as standard but are available in our wide range of powder coating colours as standard

[Technical Information](#)

Price is per linear metre including installation by our technicians.

Options include:

- Single height ballet barre (can be fixed at either senior or junior heights as recommended by the Royal Ballet School)
- Dual height ballet barre - two runs of ballet barre set at two different heights suitable for senior and junior use
- Wall mounted - wall mounts are located at intervals between the mirrors. This necessitates a small gap between each of the mirrors
- Floor mounted - floor mounts are used to support the ballet barre. This enables the mirrors to be installed with minimal gaps, resulting in a continuous image.

An "Area Charge" applies to installation work which is based on your postcode. You can enter your postcode in the form to the right to determine the appropriate amount. This will be confirmed at the checkout.
