

COVERMASTER Platinum EasyRoll Carpet

Details

The COVERMASTER™ PLATINUM EASYROLL® GYM FLOOR CARPET is the easiest and quickest way to carpet large indoor areas such as sports hall floors.

PLATINUM EASYROLL® CARPET is a premium, roll out gym floor covering specifically designed to protect gymnasium floors from damage while being used in non-athletic events.

PLATINUM EASYROLL® CARPET is comprised of a surface friendly SoftBack bottom layer, with a non-porous inner LeakBlock Core and a 100% Polypropylene yarn surface, for optimum gymnasium protection and performance.

PLATINUM EASYROLL® CARPET is available in standard charcoal grey colour

Features and Benefits

- Specially designed, multi-layered gymnasium carpet that lays flat on the floor, eliminating trip hazards.
- 6mm thick, providing a cushion against chairs, staging and high heel damage.
- Heavy duty gym carpeting and acts as an acoustical barrier for large, open areas.
- Easy to clean and maintain by the end user or it can be professionally cleaned.
- Stain resistant surface - easy to vacuum clean.
- Sections are easily rolled out and connected with it's exclusive SecureLap seam system.

These carpet rolls are finished with a SecureLap seam enabling a leak proof join that is held in place with surface fixed Velcro® joining strips. The special seam ensures the overlap does not result in an unsightly "hump" in the carpet. Please note that the carpet rolls have a maximum length of 30m, so runs over 30m will be joined together with a 4" Velcro® cross seam on the top surface.
