

Premier steel hockey goals

24HUHOC0167

Details

Freestanding Steel Premier Hockey Goals

- Manufactured from 50mm square x 2mm thick steel
- Uprights and crossbars all polyester powder coated white
- Uprights and crossbars feature stainless steel retaining rods to ensure net is held firmly in position
- Complete with net supports, lifting handles and top backbar manufactured from 25mm square pre-galvanised steel
- Lifting handles designed for use with the flip-over wheel kit

Including the flip-over wheel kit:

- 200mm diameter puncture resistant solid rubber wheels
- Wide wheels allow better weight distribution for easier transportation
- Wheel brackets are designed to be fitted to the welded plate on hockey goal uprights
- Supplied as a set of 4

Available with a choice of backboards:

- Timber - green regulation 460mm high x 18mm thick
- PVC - highly resilient PVC 460mm high x 18mm thick. Extremely weather resistant and will not warp or crack when exposed to the elements

All hockey goals must be anchored correctly to conform to BS EN 750. The goals are supplied with U-pegs to secure them on grass pitches. On synthetic surfaces, suitable alternative provision for anchorage must be made. If freestanding weights are the only option then 20 x Counterbalance weights are required per pair of hockey goals.

SKU	Options	Available Colours
