

Freestanding steel hockey goals

24HUHOC0145

Details

Freestanding Steel Hockey Goals

- Uprights and crossbars manufactured from 50mm square x 2.0mm thick steel
- Uprights and crossbars all polyester powder coated white
- Net supports manufactured from 25.4mm diameter x 2.0mm thick steel
- Board support rails for added strength
- Complete with 12 synthetic arrow net hooks per set for attaching the net to the crossbar
- Complete with a pair of 2mm thick black polypropylene nets

Including the flip-over wheel kit:

- 200mm diameter puncture resistant solid rubber wheels
- Wide wheels allow better weight distribution for easier transportation
- Wheel brackets are designed to be fitted to the welded plate on hockey goal uprights
- Supplied as a set of 4

Available with a choice of backboards:

- Regulation green timber backboards - 460mm high
- Practice white timber backboards - 152mm high

All hockey goals must be anchored correctly to conform to BS EN 750. On synthetic surfaces, suitable provision for anchorage must be made. If freestanding weights are the only option then 20 x Counterbalance weights are required per pair of hockey goals.
