

HAND WINCHED BASKETBALL GOALS

IMPORTANT

Ensure that no one is on the basketball court while operating the goals. The handwinch must be mounted high on the sports hall wall to reduce the risk of injury should a user run toward the winch and the person winching the goal must therefore stand on a platform to undertake that operation – operating the winch is strenuous and a risk assessment should be considered for that activity.

TO LOWER THE GOALS

- Turn the winch handle in an anti-clockwise direction. The goal will lower and stop when it reaches the play position.

TO RAISE THE GOALS

- Turn the winch handle in a clockwise direction. The goal will raise and stop when it reaches the stored position.

CAUTION

- Do not force the handle.
- If the goal snags on any wires or cables when operating, stop immediately and call Continental for assistance.

See recommendations in the Continental maintenance manual concerning regular maintenance inspections and reports.
